TINDR - Proj2

Problem

Singles need to expand their networks so that they can socialise.

Solution

I believe by creating an app that allows people to come across random people with the option of socialising with them or not. We enable them to socialise if both parties accept the option to.
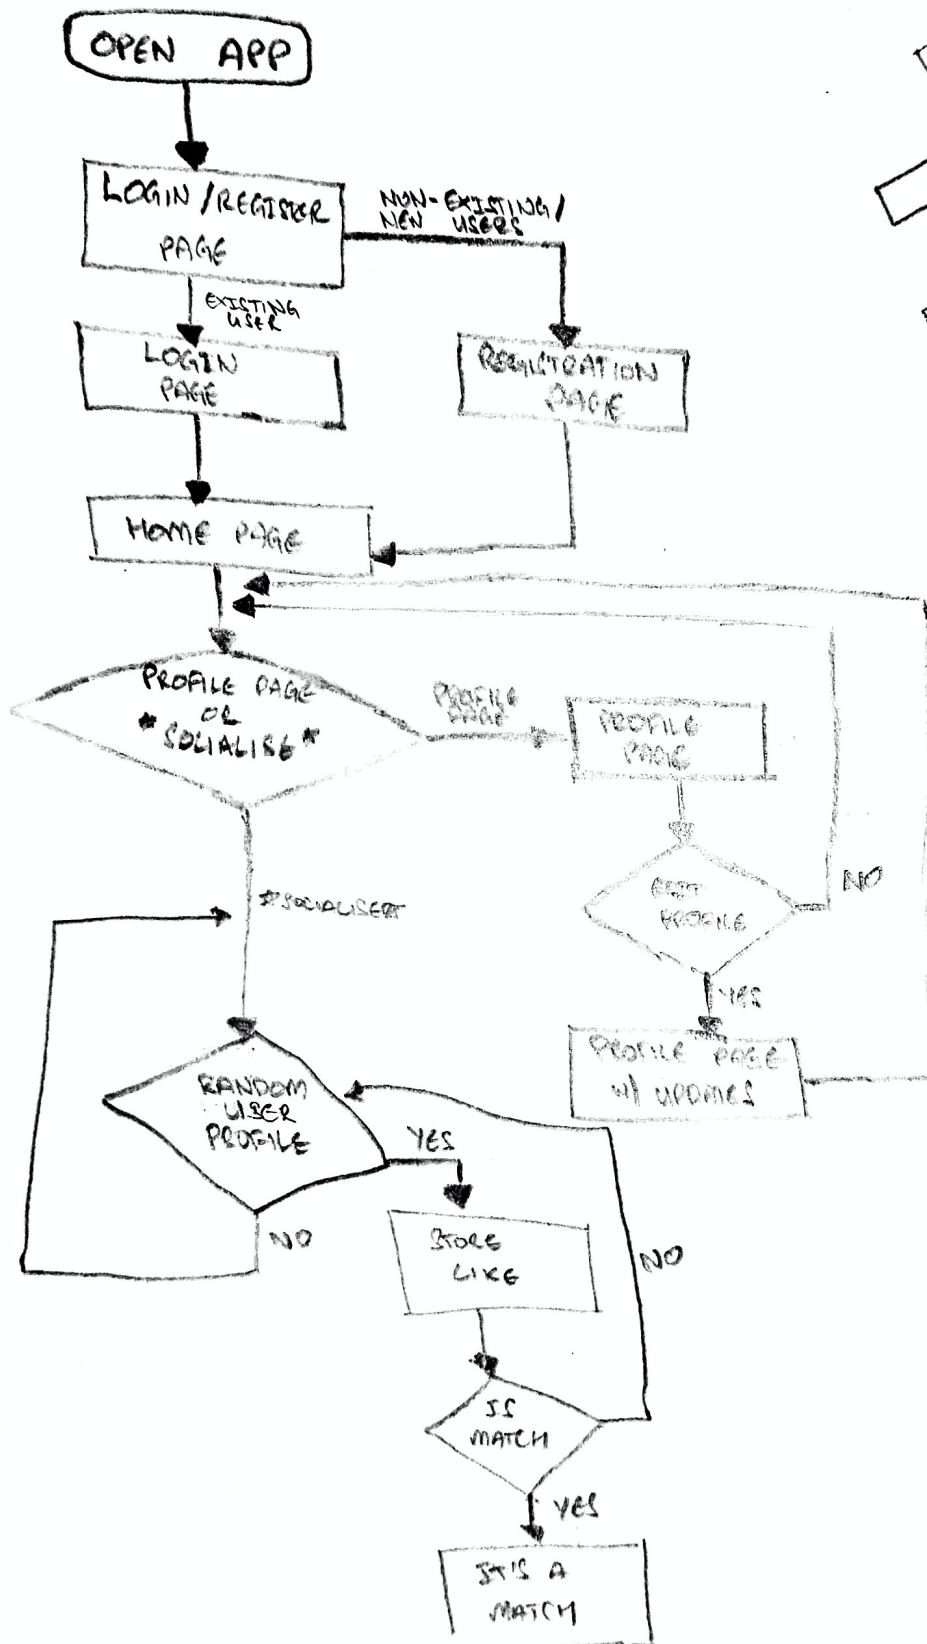

User Stories

X: "As a career-driven adult, tindr enables me to choose with whom I'd like to socialise with."
Y: "As a divorcee, tindr has given me the option of getting to know someone before meeting them."
Z: "Being on night-shifts, tindr has enabled me to socialise whilst at work"
W: "I met X on tindr. We've been great buddies since."
